# WHY INFINITE SYNC IS BETTER

UNLEASH YOUR INFINITE CLOUD STORAGE WITH INFINITE SYNC BY ODRIVE

UNIFIED ACCESS
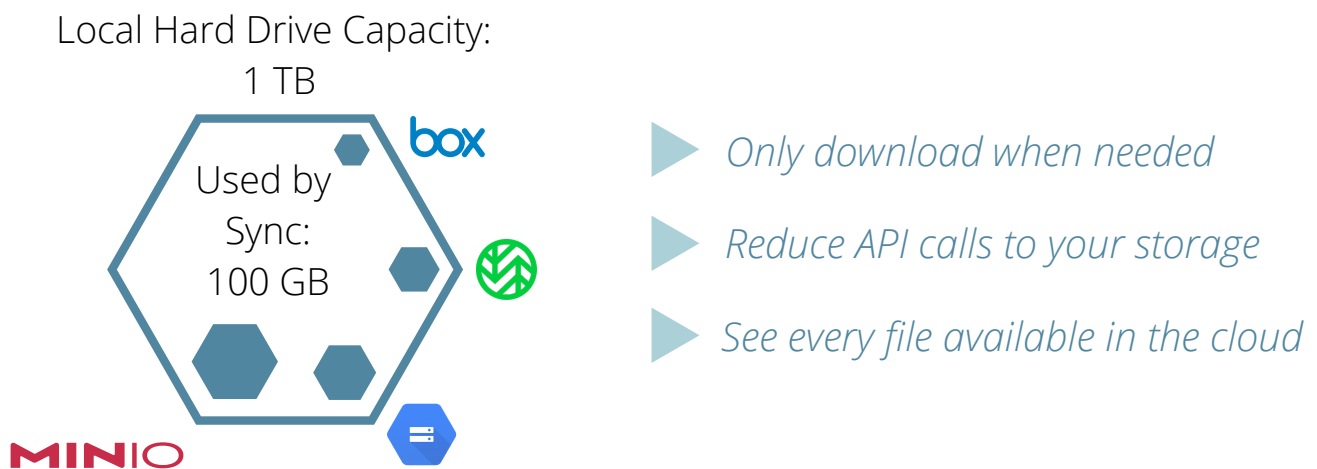

You have a lot of unstructured data in your private cloud or your public cloud. Or both. Aggregate your storage under one login with odrive.

Private Cloud

Public Cloud

MINIO

1.5 PB

100 TB

20 TB

5 TB

▶ *Unify all of your storage under one folder*

EFFICIENT AT SCALE

Your local hard drive can't fit everything stored in the cloud. Selective sync is a hassle and forces you to remember what you've excluded. Infinite sync uses placeholder cloud files that don't take up any space. Metadata calls are also limited by only progressively syncing through folders that you have accessed before so you limit API calls to your storage.

Local Hard Drive Capacity:
1 TB

Used by Sync:
100 GB

MINIO

▶ *Only download when needed*

▶ *Reduce API calls to your storage*

▶ *See every file available in the cloud*

MORE CHOICES, MORE SAVINGS

Save disk space, network bandwidth, and time with odrive. Choose any storage to sync. Take advantage of our CLI tools to automate storage tasks. Give efficient storage access to your VMs or other resource-constrained environments with our lightweight Sync Agents. Get zero-knowledge encryption and other capabilities... Unleash your cloud storage today!
